And acknowledged by the Trade and the Public generally, to
be the best and only complete arrangement for
Screen Frames ever invented.

FULL SIZE CUT OF NO. 1 CORNER.

PORTER'S

Window and Door Screen Corners.

THE BEST AND ONLY COMPLETE ARRANGEMENT FOR WINDOW AND DOOR SCREENS EVER INVENTED.

THE ready sale that PORTER'S PATENT WINDOW and DOOR SCREEN CORNERS have met with for the past four years has made them a permanent fixture in the hardware trade, and convinced the manufacturers that an article of this kind is a necessity.

No home is complete without good screens, and in order to enable all to have them, the Porter Manufacturing Company have put into the market an article that enables every one to make their own, or have them made, at about one-half the price usually charged.

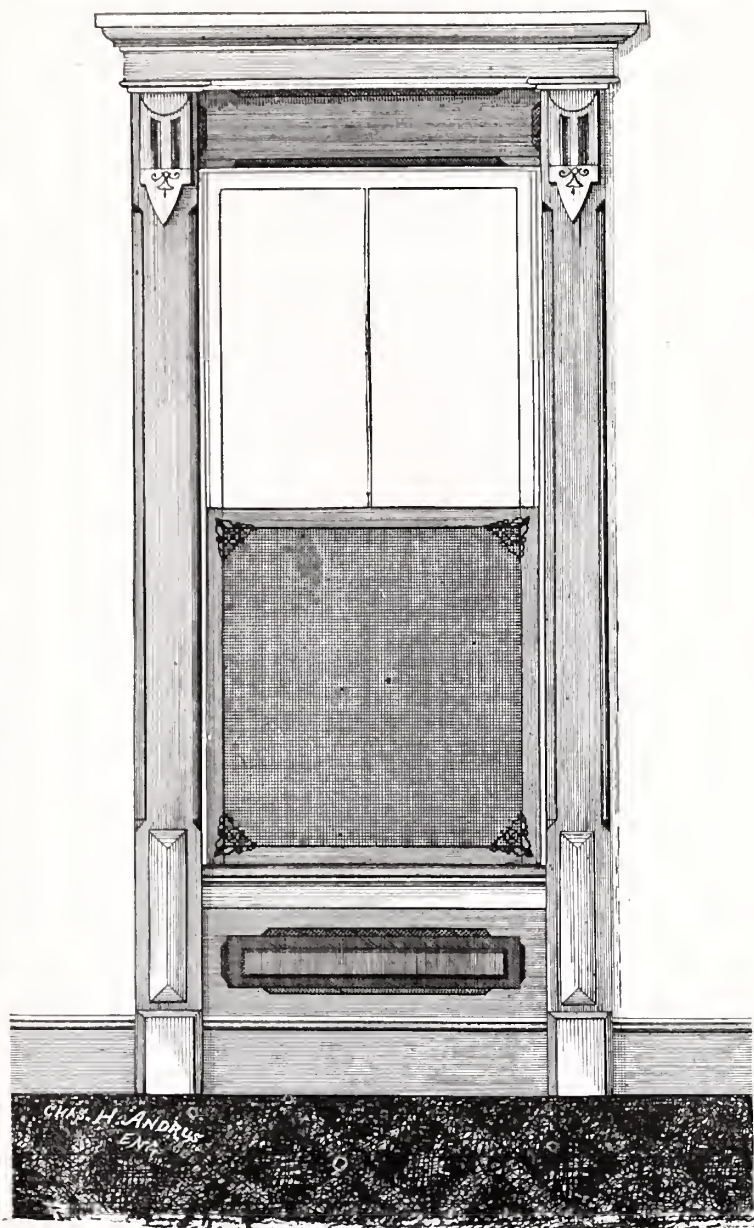

In issuing this Illustrated Price List, we have intended to show up our goods so that all can see the different styles they can be used for, and to enable any one to make the selection which they may desire, without any mistakes; and we trust the same will be appreciated.

Window Screen Frame, No. 1.

THE cut on opposite page shows a common Screen Window, made with No. 1, No. 1 1-2 or No. 4 Corners, and No. 20, or No. 120, No. 21, or No. 121 Sticks. Two of the sticks have grooves (one each side), and there being two slides or sticks that are screwed to inside casing, the Screen Frame slides from top to bottom of window, thus affording a fly-tight screen for either upper or lower sash; can be easily raised to open or shut your windows or blinds; and when not wanted for use can be raised to upper part of window under the curtain.

No. 20 or 120 Sticks are mostly used with No. 1 Corners; No. 21 or 121 Sticks are mostly used with No. 1 1-2 Corners; either Sticks are used with No. 4 Corners.

Directions for putting together accompany each set.

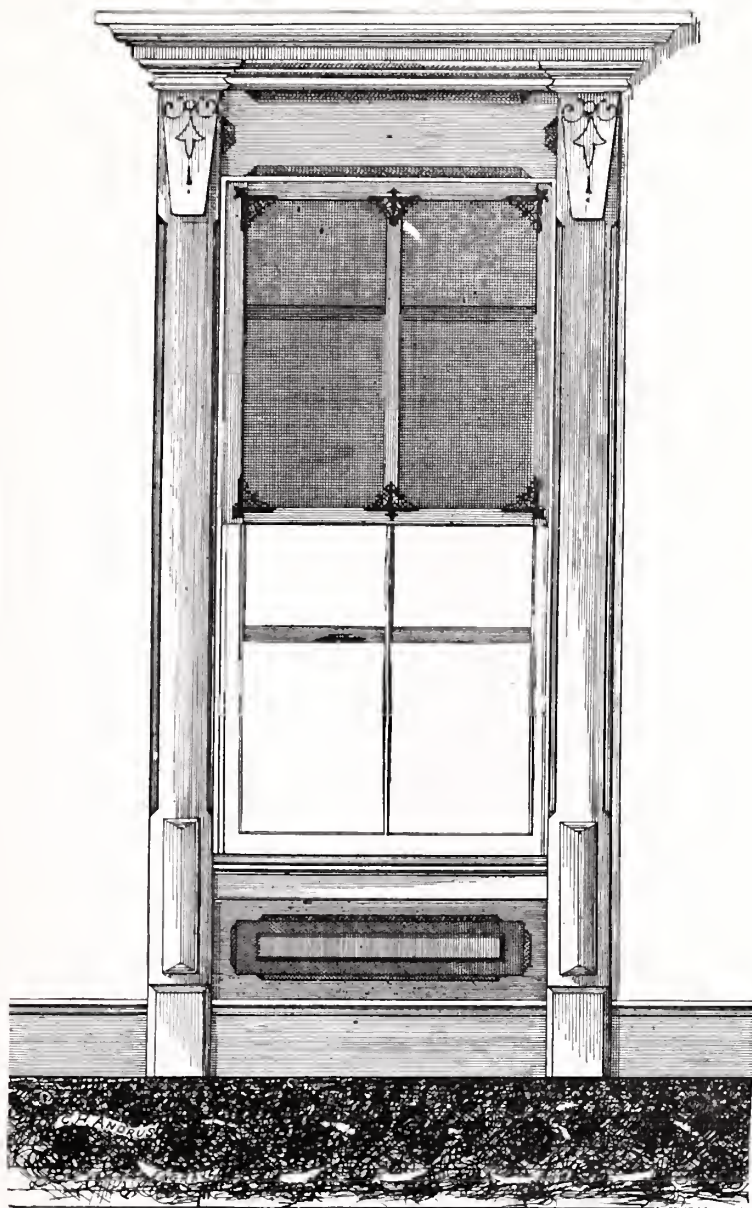

WINDOW SCREEN FRAME.

As Used for Lower Window. (Inside View.)

Window Screen Frame, No. 2.

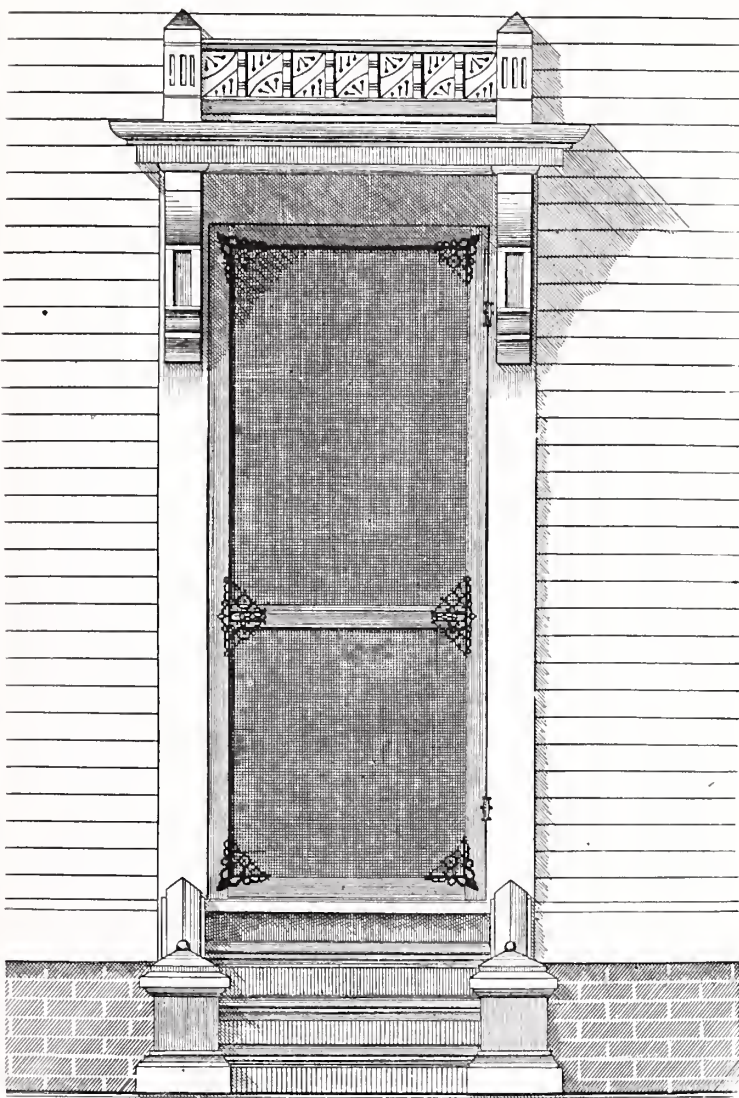

THE cut on opposite page shows a Screen Window with center piece, which is used only where the windows are quite wide, and is made with No. 1 or No. 1 1-2 Corners and No. 1-2 Center Pieces or No. 4 Corners and No. 4 1-2 Center Pieces with No. 20, 120. or No. 21, 121 Sticks, with an extra upright piece. The sticks are got out the same as frame No. 1, so they can be used for either upper or lower windows. No. 21 or 121 Sticks are mostly used for this style Frame, but are not put up expressly for it. It requires only an extra stick 7-8x1 1-4 inches, and the length desired for the height of Screen Frame, and can be very easily obtained, or will be furnished if desired.

Window Screen Frame, with Centre Piece.
As Used for Upper Window. [Inside View.]

Door Screen Frame, No. 1.

THE cut on opposite page shows a common or Two-Panel Screen Door, made with No. 2 1-2 or No. 3 Corners and any of the different size Door Sticks, and is a complete Door Screen Frame that cannot sag or warp out of shape. It is ornamental, cheap and durable. There is no mortising or tenoning, will last a lifetime, and is so easily put together to fit any door that all will see the advantage it has over the old-fashioned method of mortising, which is liable to sag and warp, while with Porter's Corners this is an impossibility.

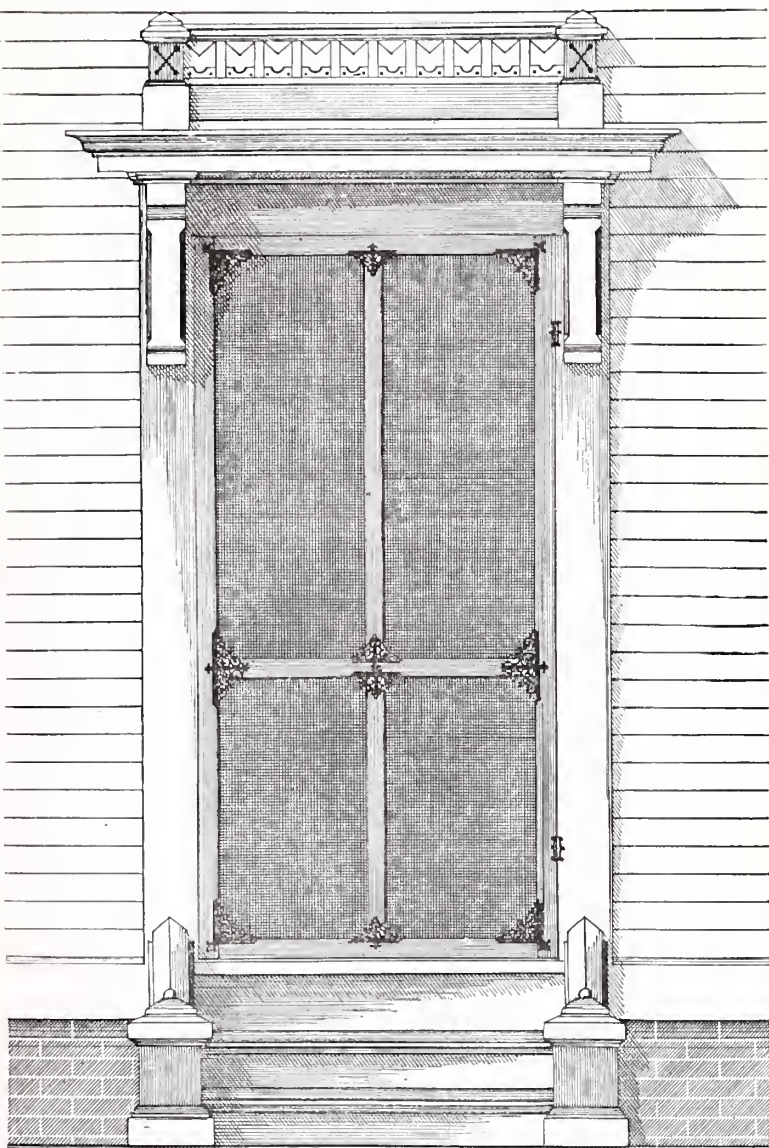

CHAS. H. ANDRUS, ENG.
ENOSBURGH FALLS, VT.

COMMON OR TWO PANEL DOOR.

Outside View.

Screen Door, No. 2.

The cut on opposite page shows a Four-Panel Screen Door, which is made with one set No. 2 1-2 and two sets No. 1-2, or one set No. 3 and two sets No. 4 1-2. The Sticks used are the same as those used in Door Screen Frame No. 1, with the addition of two upright pieces for the centre. This makes a very ornamental door, and is recommended where the frame is three feet wide or over, but is not necessary. It is very easily put together, and the expense is but very little more than for the No. 1 Frame.

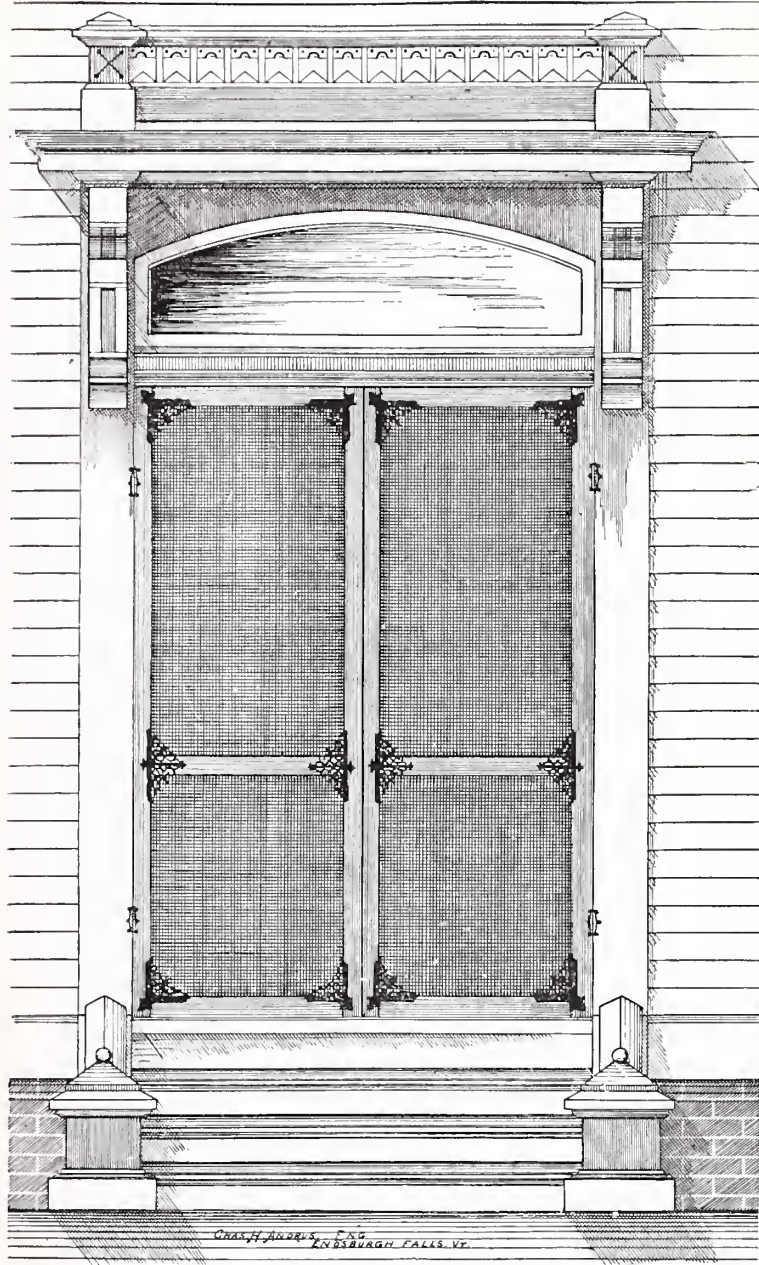

CHAS. H. ANDRUS,
Enosburgh Falls, Vt.

FOUR PANEL DOOR.
Outside View.

Door Screen for Double Doors.

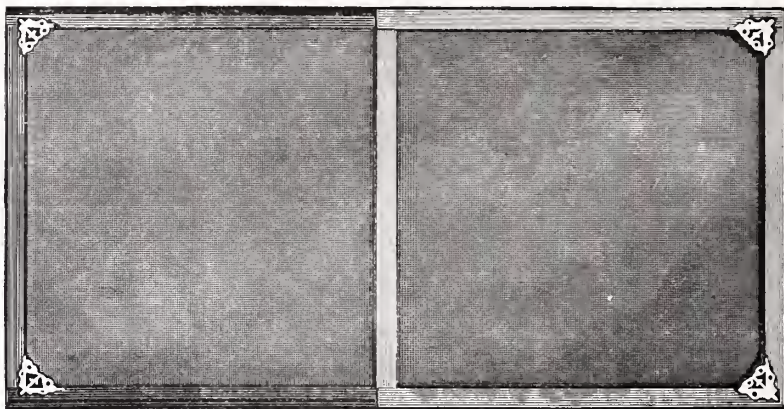

THE cut on opposite page shows a Double Screen Door which takes two sets each of Corners and Sticks, and is the style mostly used for wide store and office doors. It is usually hung with Double Spring Hinges, to swing both ways, and is the most convenient door made, especially where there is much passing in and out.

Either style Corners and Sticks are used, as in Screen Door Frame No. 1.

DOUBLE DOOR.
(Outside View.)

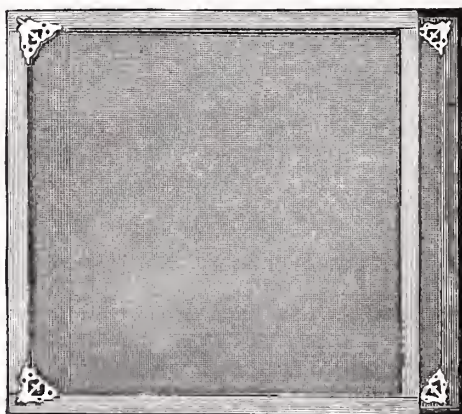

Porter's Extension Window Screen.

(Open.)

ADJUSTS ITSELF TO ANY SIZE WINDOW.

Is especially adapted for the use of people who rent houses, as they are not compelled to leave their screens when making a change of residence. The frames are made of soft wood, stained, in sizes varying from 18 to 24 inches in length, and 18 to 40 inches in width, are packed in crates, each size separate, one dozen or more in a crate to suit purchaser.

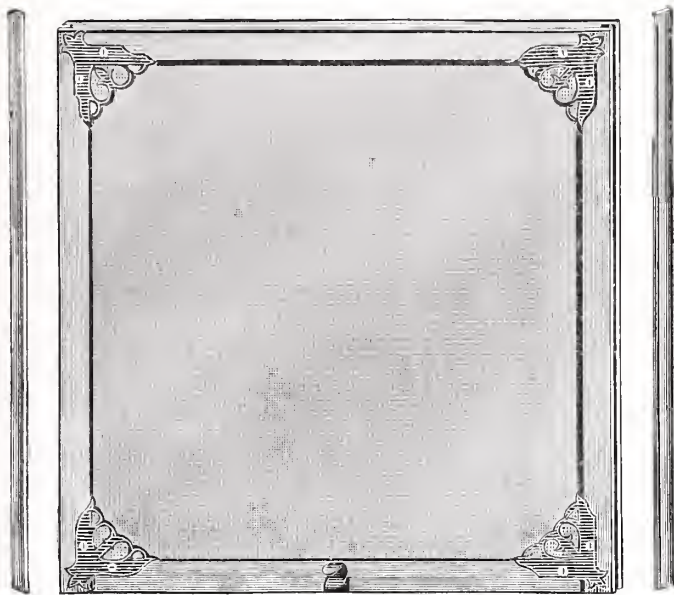

(Closed.)

18x32 -	\$ 9.00
20x36 -	11.00
24x40 -	12.00

No. 200 Window Screen Frame.

THE above cut shows a window Screen which is made of the cheapest corners and sticks we make, and is sold with the Corners and Sticks complete. The Sticks are 3-4x1 in. 3 feet long, with slides the same length, stained.

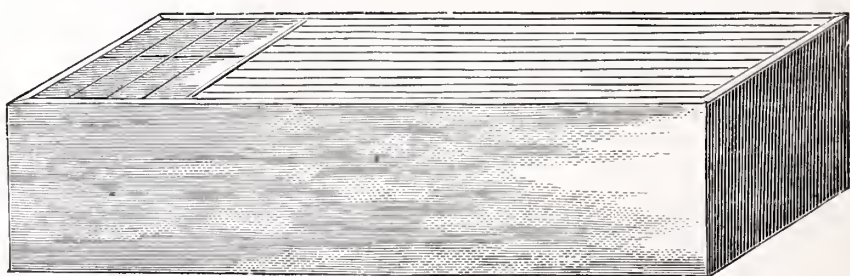

No. 200 Crated for Shipment.

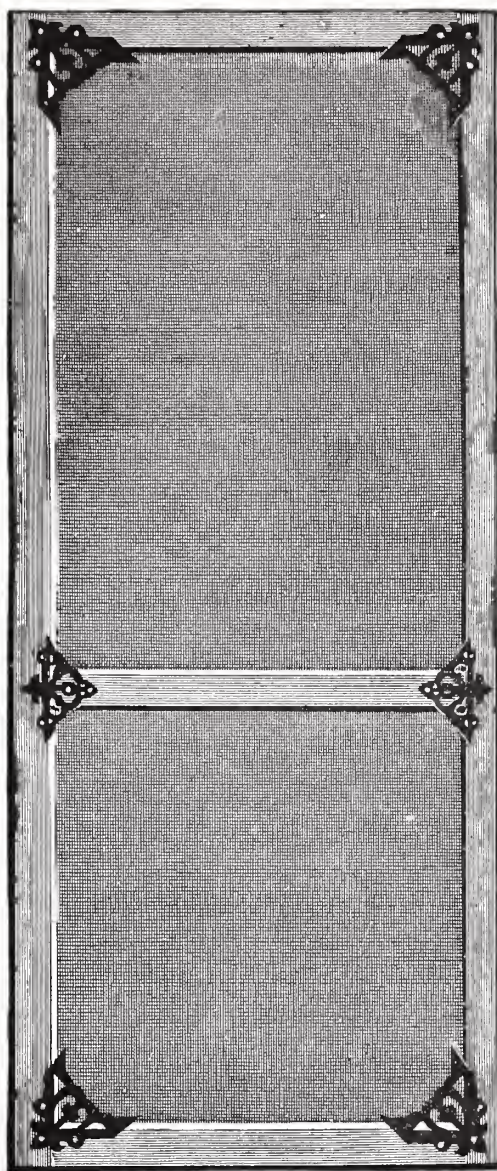

Packed 3 dozen sets in a crate. Each set of Corners are put in a box separate, and packed in one end of crate with sticks. NO CRATES BROKEN.

No. 400 or 500 Door Screen Frame.

THE opposite cut shows a Screen Door which is made with the Cheapest Corners and Sticks we make. The sticks are 2x7-8 in. and long enough to make 2-10x6-10 Door; and packed as shown in drawing, 2 dozen sets in a Crate. Each set of Corners are put into a box separate and packed in one end of the Crate with the sticks. NO CRATES BROKEN.

No. 400 or 500 Crated for Shipment.

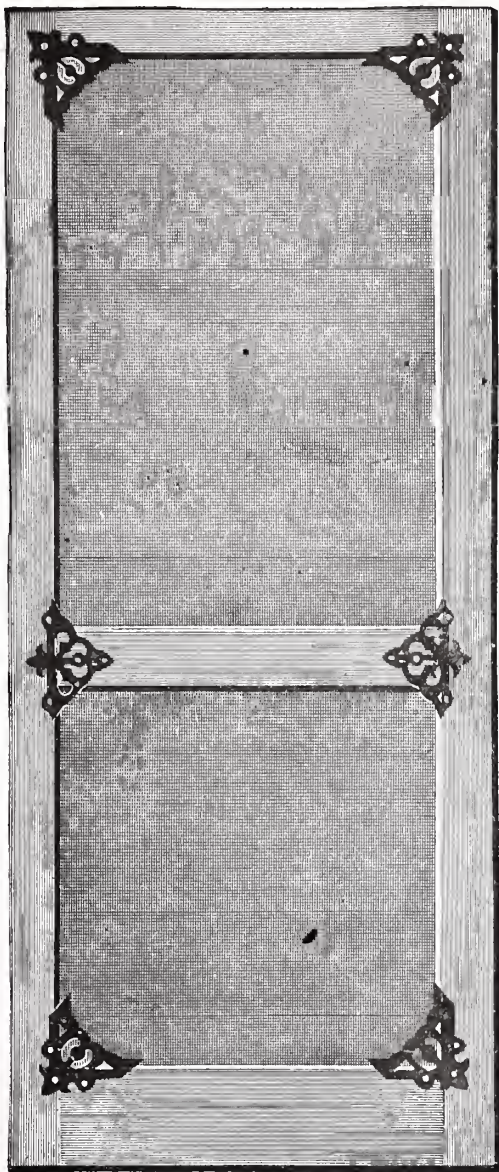

NO. 400 OR 500 DOOR SCREEN FRAME.

(See Opposite Page.)

Made-up Doors.

THE three following cuts will show the different styles of our Made-up Doors. All doors are made with our new No. 00 Door Corner, with 2 1-2 inch Sticks 7-8 thick, with center piece and base wider, as shown in drawing. All doors are stained and are complete with wire screen cloth, 1-2 inch half-round moulding, etc., ready to hang, and will be found far superior to the old style mortise and tennant doors. By using our Corners the door can not sag or warp out of shape and are 50 per cent. better than doors made in the ordinary way. Packed 6 in a crate.

PORTER'S

Patent Improved Screen Door Latch.

Patented October 30th, 1883.

WE claim this to be the best Latch for the money in the market; very easily applied, and at the same time can be used for either a Latch or Lock, and is especially designed for Screen and Storm Doors.

Packed with screws, one dozen sets in a box.

PRICE:

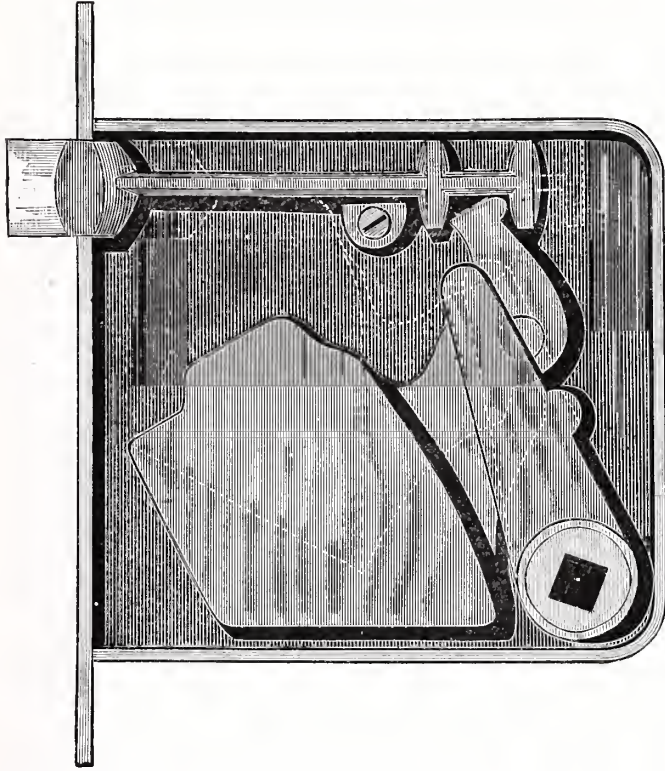

Bronzed,	-	-	-	\$2.00 Per Doz.
Nickel,	-	-	-	6.00 " "

PORTER'S CUPBOARD DOOR LATCH.

Price \$1.25 Per Dozen.

Porter and Billings' Patent Mortise Door Latch.

Patented Aug. 17, 1880, June 19, 1882, Oct. 16, 1883.

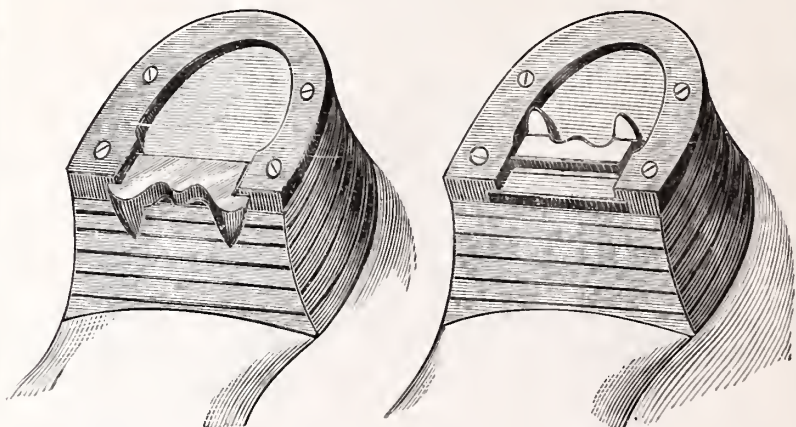

This new invention far supersedes the common Latches now in use. As the above cut will show, it does away with all springs, is a reversible Latch, in conjunction with a pivoted weighted lever, and is impossible to get out of order. It has an easy motion, responds readily, and does not require a slam to make it latch after it has been used a while, like the ordinary coil spring latch.

Packed 1 dozen in a box.

Price, \$3.00 Per Dozen.

PORTER'S PATENT COMBINATION Heel Protector and Ice Creeper.

Patented June 10, 1884.

SAFETY SECURED IN WALKING ON ICE.

Always ready for use and easily adjusted, being turned instantly.

Does not interfere with walking in the house and on the carpet.

The Protector prevents the heel from running over or wearing out.

Made in Six Different Sizes, from No. 5 to No. 10.

No. 5 Fits Nos. 1 and 2 Boys' Shoe, and Nos. 13 and 14 Boys' Boot.

No. 6 Fits Nos. 3 and 4 Boys' Boot and Nos. 4 and 5 Boys' Shoes.

No. 7 Fits Nos. 6 and 7 Men's Shoe and Nos. 6 and 7 Calf Boots.

No. 8 Fits Nos. 8 and 9 Calf Boot.

No. 9 Fits Nos. 9 and 10 Men's Shoe and Nos. 8 and 9 Kip Boot.

No. 10 Fits Nos. 10 and 11 Kip Boot.

Packed each size separate, 1 dozen pairs in a box.

PRICE, \$3.00 PER DOZEN PAIRS.

CUT FULL SIZE.

PORTER'S BLIND CORNER.

The convenience with which old blinds that have sagged out of shape can be repaired with them, and the facility with which they can be used in making new ones so they will always stay in place, will we think meet a demand which has long been felt. The corners in no way interfere with the slats turning, and can be used on either side. Two corners will in a great many cases answer the purpose.

Packed two sets in a box, 24 boxes in a Case.

\$3.00 PER DOZEN.
